EDUCATION

University of Cambridge *October 2020 -*
PhD Computer Science
Co-supervised by Simone Teufel (University of Cambridge) and Ryan Cotterell (ETH Zurich)
ESRC Scholarship
Working on Natural Language Processing, initially focusing on interpretability of language models and investigation of their inductive biases.

University of Cambridge *October 2019 - Present*
MPhil Advanced Computer Science Classification: Distinction
Cambridge Trust DeepMind Scholar
Dissertation: Using kernel methods to introduce non-linearities into linear probes without increasing probe complexity
Other Projects:

- Investigating methods for natural language generation from a meaning representation (for module L101);
- Investigating effects of combining morphological and phonological data and investigating whether this can be used to improve performance on G2P and morphological inflection generation systems (for module R250);
- Performing quantitative and qualitative evaluation of two dependency parsers (for module L95);
- Investigating methods for mitigating race-, age- and gender-based biases in affect recognition systems (for module L44).

University of Warwick *September 2012 - July 2016*
MMathPhys Mathematics and Physics Classification: 1st Class
Master's Project: Implemented a module in Macaulay2 (a Computer Algebra System) to generate Normal Toric Varieties with Picard number 3, based on an existing classification.

OTHER RESEARCH EXPERIENCE

ETH Zurich August 2020 - September 2020
Research Intern

Working with Ryan Cotterell. Project investigating novel methods for investigating inductive biases of language models.

RESEARCH INTERESTS

- Interpretability of NLP models and probing;
- Computational morphology;
- Cross-lingual NLP;
- NLP for low-resource languages;
- Grounded language models;
- Bias in NLP models.

SKILLS

Programming Languages	Python, Java, C, C++
Packages	Tensorflow, PyTorch, Pandas, Numpy, SciKit-Learn, SciPy
Parallel Computing	OpenMP and MPI with C
Languages	Good French (DELF B2, December 2016), Intermediate Japanese (JLPT N3, December 2018)
Other	LaTeX, Experience with Windows and multiple distributions of Linux

WORK EXPERIENCE

DSTL September 2016 - September 2019

Software Engineer

Worked within an Agile framework, to research and implement possible uses for machine learning and data science in defence using C++, Python, Java and Matlab. Acted as technical partner to industry offering guidance, monitoring deliverables and building relationships. Evaluated industry bids for funding for technical projects and made recommendations for funding decisions.

Google June 2014 - September 2014

Software Engineering Intern

Worked with the Text-to-Speech speech team on a 12 week project focusing on prosody of speech, using C++. Produced a prototype of an internal product for use in speech synthesis.

ACHIEVEMENTS

Awarded DSTL Thank You Award for taking on additional work at short notice in order to help team meet a deadline (2018)

Awarded Prize for Outstanding Academic Achievement at Fort Pitt Grammar School (2012)
