## EDUCATION

---

### University of Cambridge

*October 2020 -*

PhD Computer Science

Co-supervised by Simone Teufel (University of Cambridge) and Ryan Cotterell (ETH Zurich)

ESRC Scholarship

Working on Natural Language Processing, focusing on measuring the inductive biases of language models and studying compositional generalisation using group-equivariant networks.

### University of Cambridge

*October 2019 - Present*

MPhil Advanced Computer Science

Classification: Distinction

Cambridge Trust DeepMind Scholar

**Dissertation:** Using kernel methods to introduce non-linearities into linear probes without increasing probe complexity (Accepted to NAACL 2021)

#### Other Projects:

- Investigating methods for natural language generation from a meaning representation (for module L101);
- Investigating effects of combining morphological and phonological data and investigating whether this can be used to improve performance on G2P and morphological inflection generation systems (for module R250);
- Performing quantitative and qualitative evaluation of two dependency parsers (for module L95);
- Investigating methods for mitigating race-, age- and gender-based biases in affect recognition systems (for module L44).

### University of Warwick

*September 2012 - July 2016*

MMathPhys Mathematics and Physics

Classification: 1st Class

**Master's Project:** Implemented a module in Macaulay2 (a Computer Algebra System) to generate Normal Toric Varieties with Picard number 3, based on an existing classification.

## OTHER RESEARCH EXPERIENCE

---

### ETH Zurich

August 2020 - September 2020

*Research Intern*

Working with Ryan Cotterell. Project investigating novel methods for investigating inductive biases of language models.

## RESEARCH INTERESTS

---

- Inductive Biases of Language Models;
- Computational morphology;
- Compositional Generalisation;
- Grounded language models;
- Group-Equivariant Models;
- Bias in NLP models.

## PUBLICATIONS

In *Proceedings of the 17th SIGMORPHON Workshop on Computational Research in Phonetics, Phonology, and Morphology*.

## SKILLS

---

<b>Programming Languages</b>	Python, Java, C, C++
<b>Packages</b>	Tensorflow, PyTorch, Pandas, Numpy, SciKit-Learn, SciPy
<b>Parallel Computing</b>	OpenMP and MPI with C
<b>Languages</b>	Good French (DELF B2, December 2016), Intermediate Japanese (JLPT N3, December 2018)
<b>Other</b>	L <sup>A</sup> T <sub>E</sub> X, Experience with Windows and multiple distributions of Linux

## WORK EXPERIENCE

---

<b>DSTL</b> <i>Software Engineer</i>	September 2016 - September 2019
---	---------------------------------

Worked within an Agile framework, to research and implement possible uses for machine learning and data science in defence using C++, Python, Java and Matlab. Acted as technical partner to industry offering guidance, monitoring deliverables and building relationships. Evaluated industry bids for funding for technical projects and made recommendations for funding decisions.

<b>Google</b> <i>Software Engineering Intern</i>	June 2014 - September 2014
---	----------------------------

Worked with the Text-to-Speech speech team on a 12 week project focusing on prosody of speech, using C++. Produced a prototype of an internal product for use in speech synthesis.

## ACHIEVEMENTS

---

Awarded DSTL Thank You Award for taking on additional work at short notice in order to help team meet a deadline (2018)

Awarded Prize for Outstanding Academic Achievement at Fort Pitt Grammar School (2012)
